

**COMPANY:**

**The Heat Express**

Theft prevention and fleet efficiency, productivity.

**UNIQUE VALUE PROPOSITION  
FOR TRANSPORTATION,  
LOGISTIC, SERVICES,  
GOVERNMENT, CONSTRUCTION  
AND PERISHABLES MONITORING**

**The most functional and affordable GPS tracking solution.**

**assured Techmatics Tracking** allows not only monitoring the position of a vehicle, but offers many more options such as determining whether a door was opened, if the air conditioning compressor is currently running or remotely lock doors or block the engine's ignition. It also provides routing, geofences, alerts and many more features to help you better manage your fleet and drivers. Our advanced alerts system allows notifications via SMS or email when odometer has reached a specific value, driver is speeding, a vehicle enters or exits a point of interest (geofence) and also offers idle, stop, unused asset (vehicle, trailer) with the necessary intelligence to better control your costs and improve operating efficiency.

“The cost of a full installation for our fleet has paid for itself in more than one way. We have become more efficient in the routing. Out of schedule deliveries have been drastically reduced”

**Logistics and Transportation**

Reduce costs and improve efficiency while lowering your fuel costs, increasing productivity and have faster response times.

**Oil, mining**

Complete visibility for your employees, vehicles and equipment on remote locations. With layers of weather and traffic to identify problems ahead of time.

**Construction**

Finish all jobs on time. Make sure all your materials, workforce and equipment are where you expect them. Our solution helps you increase productivity and increase customer satisfaction.

**Services**

We help you dispatch more service calls, communicate with your field workforce, increase customer satisfaction while reducing fuel consumption and operating costs.

**Affordable, feature-rich GPS tracking solution.**

**State-of-the-art suite of safety, compliance, productivity and efficiency solutions developed for drivers, fleet managers, back-office and your partners through integration.**

## Fleet Optimization

Real-time, exact vehicle location, route calculation and monitoring, dispatching and open API for third-party system integration.

## Driver Safety

Vehicle usage during allowed hours only, driver score card with behavior analysis for driver training. Multi-country regulations compliance.

## Productivity

**assured Techmatics Tracking** lets you know 24/7 the exact location of your vehicles and workforce, if they are idling longer than permitted, and the most optimal route to your destinations.

## Efficiency

Route optimization, fuel monitoring, temperature monitoring and driver identification are just a few of the features we provide to help you run your business more efficiently.

## Open APIs

Industry standard protocols for full telematics and custom integrations with third party transportation management systems.

## Safety

Define a schedule with our "allowed working hours" and our solution will automatically block the vehicle from running the engine during blocked hours. Our driving behavior analysis helps you minimize accidents and train drivers.

## COMPANY PROFILE

One stop technology provider for fleet companies founded in 2004 with more than 7000 customers on multiple verticals (personal, oil industry, construction, delivery, luxury car rentals, remote areas, long haul, government, first responders and others).

Our vision is to provide tracking solutions worldwide to secure and protect people and assets, increase productivity and improve customer satisfaction.

We have a passion for extraordinary service and to always exceed our customers' expectations and provide the best possible value with our products and services.

"It's worth saying that we eradicated the major problems with regards to fuel loss."
